## WORK EXPERIENCE

### SalonTarget

Aug 2020 - Present

#### Software Development Engineer

- Performs daily bug fixes and feature changes to support SalonTarget - an online platform that provides kiosk/online booking, POS, sale reports, inventory management, marketing tools... to 700+ salon/spa owners.
- Collaborates with CTO, VP of Engineering, and Product Owner to implement UI features (Javascript, JQuery) & Back-end features (Node-Express.js/PHP) requested by clients periodically and ensure MySQL architecture design is solid.

### QualityLogic

May 2019 - Nov 2019

#### Software Engineer in Test (Contractor)

- Built 200+ test cases for REST API Endpoints, spanning in 50+ test files written in customized Pytest and JUnit frameworks. Test cases were integrated into Jenkin (CI/CD pipeline) and automatically executed in daily PR builds.
- Participated with other SDE engineers in 2 teams to provide monthly updates/releases & bug fixes for 2 of Ultimate Software's HR Survey Solutions: Perception (SaaS using Flask) and Performance (SaaS using Angular/Spring).

### Edizeven

Feb 2019 - May 2019

#### Full Stack Web Developer Intern

- Implemented API Endpoint "/restaurants" that contains multiple "widgets" using Spring (Java MVC Framework).
- Assisted Frontend Developers in generating SPA (using Angular.js) & in QAing for smooth user experience with objective is to keep below 15% of total bugs.

### Seattle Central College

Sep 2018 - Mar 2019

#### IT Programming & Computer Science Tutor

- Conducted 1 on 1 trainings and group learning sessions on beginner and intermediate Java, Python, Web Dev (HTML/CSS/JS), basic DevOps (Host/Server/\*Nix CLI) concepts to college students.

### MedeAnalytics, Inc

May 2014 - May 2015

#### Business Intelligence Engineer

- Helped implement ETL processes/stored procedures & distribute Big Data solutions (Revenue Cycle/Revenue Integrity) to over 120+ clients in the healthcare analytics industry using BI Tools (MS SQL Server Mgmt Studio).

## COVER LETTER (Profile summary / Recent projects)

- Please visit: [tungthecoder.dev/cover+letter.pdf](http://tungthecoder.dev/cover+letter.pdf)

## PROJECTS

[github.com/TungTNg](https://github.com/TungTNg)

### tungthecoder.dev

[github.com/TungTNg/tungthecoder](https://github.com/TungTNg/tungthecoder)

Laravel, Apache Web Server, MySQL, Vue.js, Bootstrap,

- Developed a personal portfolio website with a login system from scratch to promote all of my projects, secured by Cloudflare.

### Dating App

[github.com/TungTNg/DatingApp\\_.NET\\_Angular7](https://github.com/TungTNg/DatingApp_.NET_Angular7)

.NET Core, Kestrel Web Server, SQLite, Angular, Ngx-Bootstrap

- Designed a social dating network to help connect single adults to their soulmate with features including Likes, Messages, File Upload.
- Applied successfully abstract OO concepts (Repository, Interface, Singleton...) and learned how to debug issues related to SPA routings.

### Go Places

[github.com/TungTNg/goPlaces](https://github.com/TungTNg/goPlaces)

Express (Node.js), MongoDB, Bootstrap

- Created a basic Yelp Clone specialized for local attractions & travel tours with desired future functionalities to include Comment, Review, Share, Private User Messages/Payments, Booking System...
- Proactively acquired knowledge to resolve problems associated with having multiple web servers on a single virtual machine (EC2).
